

CONTINUING EDUCATION FOR FIRE DEPARTMENTS

Bensen Fire & Safety Consulting can assist your fire department with continuing education to ensure the protection of lives and property of the citizen in your community. We understand that firefighters are required to continually train and keep their equipment in a constant state of operational readiness. We can provide training in any area. As the emergency response environment continually changes around us, firefighter's response requirements continue to change as well. The best way to keep up with changes in our environment and technologies is through the continuance of training.

Training and continuing education are essential for the readiness, confidence, and safety of the fire service. It is imperative that firefighters are competent; completion of a job or task is a reflection of the individual and community.

Bensen Fire & Safety Consulting's training exceeds the continuing education requirements set forth in the Ohio Administrative Code (OAC) Sections 4765-20 for firefighters and 4765-20-16 for fire safety inspector. For individuals using the training as continuing education in the State of Ohio for fire and/or inspector certifications; it is your responsibility to seek approval from your fire chief or a program director as they are the authority having jurisdiction (AHJ) to approve training and continuing education units (CEUs).

As with all training that Bensen Fire & Safety Consulting conducts we can accommodate any schedule and provide training at your facility. We customize our training utilizing each department's equipment and policies and procedures. This will provide each individual firefighter the opportunity to become familiar with equipment that they may use at the scene of emergencies when time may be of the essence.

Contact Bensen Fire & Safety Consulting today to discuss or schedule your training needs at info@bensenfireandsafety.com
