

GLOBALLY HARMONIZED SYSTEM (GHS)

Hazard Communication Standard (HCS) to align with the United Nation' Globally Harmonized System of Classification and Labeling of Chemicals (GHS)

Bensen Fire & Safety Consulting has created a training course that explains the changes in OSHA's Hazard Communication Standard that now aligns with United Nation's Globally Harmonized System of Classification and Labeling of Chemicals (GHS). This training exceeds the requirements of the December 1st, 2013 training deadline, and effectively informs employers of upcoming labeling and Safety Data Sheet changes.

Bensen Fire & Safety Consulting's four hour compliance training entails:

- **Training On Label Elements:**

- Product Identifier
- Signal Words
- Pictogram
- Hazard Statement(s)
- Precautionary Statement(s)
- Name, Address and Phone Number of the Chemical Manufacturer, Distributor, or Importer
- How the employee might use the label in the work place

- **Training on changes from Materials Safety Data Sheet (MSDS) to a Safety Data Sheet (SDS)**

- Standardized 16 section format, including a comprehensive explanation of each section of the new SDS format, with detailed definitions of specific chemical properties, new physical and health hazards
- How the information on the label is related to the SDS
- How new format better protects the employee(s)
- What precautionary statements would be the same on the label and on the SDS
- These will meet requirement for phase one, December 1, 2013
- Discuss what requirements you will need to meet the June 1, 2016 deadline.

- **Classification of Chemicals:**

- Use of standardized classification system
- Discussion of responsible parties
- List and define hazard classes and categories
